PROMOS & NEWS

There are many benefits to choosing grass-fed, pasture-raised beef: It contains more essential fatty acids, and is lower in the "bad fats." It is said to taste better. It is lower in calories. It is more nutritious, contains a higher amount of vitamins and minerals, especially Vitamin E (200%). It does not contain artificial hormones or antibiotics. The cattle are treated better, able to roam free, aren't forced to eat food they weren't meant to eat, and they aren't injected with anything that may cause potential harm to their bodies. It does not contribute to global warming.
